

The following formulas will be given to you on the midterm.

- **Product rule:** If  $F(x) = f(x)g(x)$  then

$$F'(x) = f'(x)g(x) + f(x)g'(x).$$

- **Quotient rule:** If  $F(x) = \frac{f(x)}{g(x)}$  then

$$F'(x) = \frac{f'(x)g(x) - f(x)g'(x)}{g(x)^2}.$$

- **Chain rule:** If  $F(x) = f(g(x))$  then

$$F'(x) = f'(g(x))g'(x).$$

- **Power rule:** If  $F(x) = f(x)^n$  then

$$F'(x) = nf(x)^{n-1}f'(x).$$

- **Quadratic formula:** If  $ax^2 + bx + c = 0$  then

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}.$$

- **Integrals:**

$$\int u'(x)u(x)^n dx = \frac{u(x)^{n+1}}{n+1} + C \text{ if } n \neq -1;$$

$$\int u'(x)u(x)^{-1} dx = \ln |u(x)| + C;$$

$$\int u'(x)e^{u(x)} dx = e^{u(x)} + C.$$

- **Present value:** If  $f(t)$  is a revenue stream and  $r$  the interest then the future value of the stream after  $T$  years is

$$\int_0^T f(t)e^{-rt} dt.$$
